

Webscraping I: Do Pair Share Solution

Peter Ganong and Maggie Shi

November 3, 2024

Do-pair-share: solution

1. Inspect the HTML code on the Harris Specialization in Data Analytics page
2. What is the tag associated with the text: “Students in the Master of Science in Computational Analysis and Public Policy...”?

```
<strong>
```

3. What are examples of other content associated with the same tag?

```
<strong>Still have questions?</strong>
```

4. Look at attributes for tags with links. Some of them do not appear to be “full” links. Can you explain why?

```
<a href "/admissions">Admissions</a>
```

This appears to be a *relative path*, whereas the *absolute path* is:

`https://harris.uchicago.edu/admissions`
